## Objective

---

Passionate Full Stack Web Developer committed to leveraging my skills to help organizations reach their strategic goals through innovative web solutions and effective teamwork. Dedicated to continuous personal and professional growth to contribute effectively to successful project outcomes.

## Experience

---

- Full Stack Web Developer  
Brightcom Group Private Limited  
November 2022-Present

As a Full Stack Web Developer at Brightcom Group, my role involves developing web applications using various technologies such as React, Node.js, MySQL, Python, Django, HTML, CSS, Bootstrap, and MongoDB.

## Skills

---

- Front-End: Js,React, Html,Css, Bootstrap
- Back-End: Node js, Express js, Django
- Databases:MySQL,Mongodb
- Version Control:Git, GitHub
- Programming Languages: Python

## Projects

---

- **Personal Portfolio Website**  
Technologies Used:React,GitHub

Developed a personal portfolio website to display my web development projects and resume.

- **OTT Platform**  
Version 1 & 2:

Technologies Used: Python,Django,MySQL

Spearheaded the development of a robust OTT (Over-The-Top) streaming platform, leveraging Python and Django to create a scalable and secure back-end architecture.

Led a team of developers in designing and implementing a user-friendly interface, ensuring optimal performance and seamless user experiences across various devices.

Managed the database integration using MySQL to handle large volumes of data efficiently, ensuring fast access and reliable storage of user data and media content.

Integrated Razorpay payment gateway to facilitate secure and hassle-free financial transactions, enabling subscriptions and in-platform purchases.

Coordinated between cross-functional teams to align the platform development with strategic business objectives, ensuring features and updates were delivered on schedule and met quality standards.

Implemented best practices in code development and review processes, significantly reducing bugs and downtime while enhancing application performance.

Conducted regular team meetings and provided mentoring to junior developers, fostering a collaborative team environment and promoting continuous learning and development.

Version 3 & 4:

Technologies Used: Reactjs,Node js, MySQL

Led the development of a high-performance web application using React for the front-end and Node.js for the back-end, ensuring a responsive and intuitive user interface.

Oversaw a team of developers in creating and maintaining robust server-side logic using Node.js, effectively handling data processing and integration with a MySQL database for secure and efficient data storage. Engineered a comprehensive API layer with Express.js to facilitate effective communication between the front-end and the database, optimizing data retrieval and manipulation processes. Implemented advanced features and optimized application performance to handle complex user interactions and data-heavy operations. Managed version control and code reviews using Git, ensuring best coding practices and maintaining high code quality across the development team. Conducted scalability tests to ensure the application could handle expected loads, leading adjustments in architecture to improve system resilience and performance. Facilitated agile development cycles, organizing sprints and daily stand-ups to keep the team aligned with project goals and timelines, and ensured continuous delivery of features.

- **Ecommerce Website**

Technologies Used: Reactjs, Node js, MySQL

Directed the development of a comprehensive eCommerce platform, utilizing React for a dynamic and responsive front-end, and Node.js for efficient server-side operations. Led a team of developers in integrating MySQL for robust database management, ensuring swift and secure handling of large-scale user data and transaction records. Implemented Razorpay payment gateway to provide a seamless and secure checkout experience, supporting multiple payment methods to enhance customer convenience. Architected and developed an advanced admin panel for real-time site management, including product uploads, inventory control, and order management, empowering non-technical team members with user-friendly tools for website administration. Coordinated the development lifecycle from concept through deployment, ensuring all features were delivered on time, within budget, and adhered to the highest standards of quality. Applied best practices for API security, including data validation and authentication, safeguarding user data and transaction details against potential threats. Organized and led agile development sprints, facilitating daily stand-up meetings, sprint planning, and retrospectives to maintain a high level of team communication and project transparency. Provided ongoing support and mentorship to team members, enhancing skills across the team and fostering a collaborative environment that encouraged innovative problem-solving.
